After all traffic is migrated off the Garland Southeast, TX GTD5 switch and remotes, it will be retired and removed from the network.

Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Irving Tandem or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Garland Southeast, TX GTD5 switch, and remotes will be required to reposition the codes to the Irving Tandem switch.

All ASRs (Access Service Requests) for the Irving Tandem switch must be received no later than September 7, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by September 30, 2024. All ASRs for the Irving Tandem switch must carry the project code of GRLDTXXEDSO.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Garland Southeast, TX GTD5 switch and remotes.
