Description of Reasonably Foreseeable Impact of the Planned Changes (cont.):

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Dallas Tandem or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Miller Grove, TX DMS-RLCM switch and remotes will be required to reposition the codes to the Dallas Tandem switch.

All ASRs (Access Service Requests) for the Dallas Tandem switch must be received no later than December 2, 2024, to provide sufficient time to migrate the traffic described above. All traffic must be moved by December 16, 2024. All ASRs for the Dallas Tandem switch must carry the project code of MLGRTXXARSO.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Miller Grove, TX DMS-RLCM switch and remotes.
